-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as failing to set forth the subject matter which applicant(s) regard as their invention. Claim 8 contradicts claim 1.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Sembritzki et al (6650726). Sembritzki teaches a CT system comprising rotating gantry 8, x-ray source 1, x-ray detector array 3, patient support 6, data processor 11 and display 12. Processor 11 analyzes projection data so as to retrieve data that was acquired during a quiescent heart phase for at least one revolution of the gantry. See lines 28-37 of column 2 and lines 1-5 of column 4.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2882

Claims 3-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sembritzki. Sembritzki does not mention "test images", but it would have been obvious to employ Sembritzki's system to acquire multiple images, some of which may be for testing.

Claims 9-13 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sembritzki as above in view of Hounsfield (4206363). Sembritzki does not mention use of an ECG, but such is taught by Hounsfield to detect quiescent phases of the heart, and it would have been obvious to employ an ECG in Sembritzki's system to verify the occurrence of rest states.
